

TRIPLE SEPARATION

Clean 100

A cleaner and safer working environment

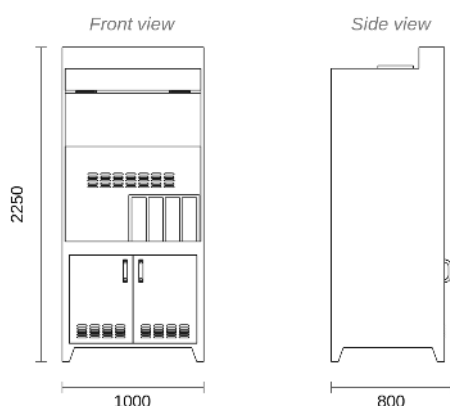

The CLEAN cabinet is the result of 30 years of experience – a complete solution for every task involving solvents or water-based materials.

A built-in supply-air box and the unique Spray Stop cassette provide triple separation of paint particles and a constant supply of fresh air.

KEY FEATURES

- Built-in supply-air box**
Standard in every CLEAN cabinet; provides a constant supply of fresh air.
- Triple separation**
The Spray Stop cassette and the existing filters capture paint particles in three stages.
- Easy cleaning**
Spray paint samples or clean guns directly against the easily accessible paint trap.
- Safe paint handling**
Store washing liquid and paint residue ventilated under the bench until cured.
- Prepared for supply air & luminaire**
Option to connect supply air and built-in lighting for precision work.
- Versatile & future-proof**
Suitable for both water- and solvent-based materials.

DIMENSIONS
